

CORPORATE STATEMENT FROM **DAVID STUCKEY**

Selectrix Industries started as a small family business in Preston back in 1978. Our philosophy is very employee biased, which has resulted in a very close knit Selectrix community of loyal, talented, and hard working members. Many employees have been with the company for periods of 10 to 20 years, and then there are sons/daughters who have also started, bringing another generation with new fresh ideas.

We have two main specialties, the Selectlok brand of industrial locks, latches, hinges, and sealing rubber used in any sheetmetal cabinets. Applications can include electrical switchboards, IT server racks, telecommunications cabinets, trucks, service vehicles, buses, trains, trams, and any other application requiring a metal cabinet to be locked. Then there is the high technology arm of the Selectrix Group, called Selectrail. Selectrail specialises in products to service the Railway Signalling industry.

The Selectlok Division is due to release many new products that have been in development. For instance, one example being electronic locking solutions that do not require external electric power, nor do they require batteries. The locking

barrel contains a mini generator that is powered up after the key is inserted. Hence solving the problem of either getting mains power to a lock barrel/padlock and/or solving the problem of batteries constantly going flat.

The Selectrix Group has been the recipient of the most innovative product award from FEN/AIEE for it's swing handle innovation solution for safely locking outside electrical cabinets and ensuring against both water ingress and vandalism, the traditional headache of municipalities and utilities in control of these major assets.

We are proud of the long term relationships it has with our Global Strategic Partners. Together we offer the widest range of products and services which are married to a leading edge technology base.

David Stuckey

BRIEFINTRODUCTION

WHO ARE OUR CLIENTS?

We service the needs of a wide range of industry and Government sectors:

- Sheet Metal Manufacturers
- Electrical
- Telecommunications
- Hardware
- Engineering Consultants
- Railways
- Utilities
- Defence
- Truck Body Builders
- Retail Outlets

We want to work with our Clients in long term business arrangements that offer both parties unique relationships which promote mutual growth and prosperity. We believe that we can offer our clients quality, reliable, innovative products and solutions to meet their needs.

SERVICES

Our range of additional services include:

- Reliable & Accurate Supply
- Practical Design Solutions
- Quality Systems & Controls
- CAD Facilities
- Manufacturing Services
- High Customer Service Standards
- Research and Development

GUARANTEE

That our Customer Service will be of the Highest Level and we will strive to achieve customer satisfaction regardless of Order or Company Size.

RUBBER SEALING

- Rubber sealing EPDM, Perbunan, or natural
- Self gripping rubber sealing profiles
- Window rubber
- Truck Door Rubber

STAINLESS STEEL

- Stainless Steel Quarter Turns
- Stainless Steel 3 point Locking
- Stainless Steel T/L Handles
- Stainless Steel Hinges
- Stainless Steel Swing Handles
- Stainless Steel Gas Struts

SINGLE POINT LOCKING / 3 POINT LOCKING SYSTEMS

- Quarter turn Latches
- T/L Handles
- Wing Knobs
- Padlockable Latches
- 3 Point Locking
- Quarter Turns vibration proof
- Slam Cams
- Lockable Rods with or without rollers
- Pressure tight system for explosion proof cabinets
- Swing Handles die cast or polyamide
- Emergency Internal Handle
- Flush Locks

HINGES

- Concealed Hinges
- Hinges for flush doors
- Lift off Hinges
- Hinges for prominent doors
- Brass Pintle Hinges

TRUCK SOLUTIONS

- Folding T Handles
- Pop Out T Handles
- Slam Catches
- Spring Bolts
- Door Holders
- Adjustable Over Centre Fasteners
- Compression Handles
- Truck Door Rubber
- Lashing Rings
- Anti Luce
- Rubber Bonnet Catches

OUR GLOBAL NETWORK OF STRATEGIC PARTNERS

SELECTLOK® is proud of the long term relationships it has with our Global Strategic Partners. Together we offer the widest range of products and services which are married to a leading edge technology base.

OUR PROMISE OF COMMITMENT!

- We will take the time to listen and understand our Customers needs
- We will work with our Customers to find the right solution for their technical and environmental needs
- We can design the right solution for our Customers
- We will enter into partnership with our Customers to implement the correct solution to meet their needs

- High quality zinc plating

MATERIAL & FINISH:

Material Zinc die cast Finish Zinc plated

INTERNAL HANDLE

FEATURES:

- Suits 8mm square shaft
- Fully adjustable
- Heavy duty construction

MATERIAL & FINISH:

Material Mild steel Finish Zinc plated

THREE POINT LOCKING

FEATURES:

- Suits 8mm square shaft
- Fully adjustable
- Grub screw fastening
- High quality zinc plating
- To suit door height up to 2400mm

MATERIAL & FINISH:

Material Mild steel Finish Zinc plated

EMERGENCY INTERNAL HANDLE

FEATURES:

- Suits 8mm square shaft
- Fully adjustable
- Heavy duty construction
- Push button action
- Is suitable for use with swing handles
- 3 point locking compatible

MATERIAL & FINISH:

Material Zinc die cast/mild steel

Finish Zinc plated

May require shaft extension shown on page 3-4

TECHNICAL PROPERTIES

VALUE

Backing Material Closed Cell PVC/Nitrile Foam

Adhesive Type Acrylic

Adhesive Power 6 N/25mm

Foam Density 91 kgs/m3

Elongation 100%

Tensile Strength 73.5 N/25mm

Water Tightness 100% at < 10% compression

Water Absorption ASTM D1056-73 6% (by weight)
Thermal Conductivity 0.27 btu

Temperature Resistance - 10°C to + 80°C

Flammability ASTM D1692-74 Flame retardant and self extinguishing

Ozone Resistance Good
UV Resistance Good
Chemical/Solvent Resistance Good
Petrol/Oil Resistance Good
Tear Resistance Good

Tape Thickness 3mm, 6mm, 9mm and 12mm

Tape Widths 6mm to 1220mm

Colour Available Black

CLOSED CELL PVC NITRILE FOAM

FEATURES:

- Foam compresses easily, is highly conformable and recovers quickly
- Filmic interliner prevents stretch during application
- Robust foam is tear and abrasion resistant
- Electrical non-conductive can be used as an electrolysis barrier
- Good resistant to high temperature and weathering
- Good thermal insulation properties
- Available in die-cut pads and gaskets
- Supplied in 9m rolls

MATERIAL:

- Sealing electrical enclosures and switch cabinets
- Sealing industrial access doors and hatches
- Sealing hatches on boats
- Sealing externally mounted air conditioning equipment
- Pipe- wrap insulation of hot and cold pipes

SELF ADHESIVE TAPE

FEATURES:

- Scrim netting for better resistance to overstretching
- High quality adhesive
- Supplied in 10m rolls
- Other sizes available
- Closed cell construction

MATERIAL:

EPDM

POLIALL HINGE

FEATURES:

- Pre-drilled holes dia. 5.0mm
- Temperature range: -20°C to +40°C
- 30,000 cycles of opening/closing

MATERIAL:

- Natural Anodized Aluminium
- Black Polyuretan

TILA CONTINUOUS HINGE

- Suitable for doors, tailgates, covers and flaps.
- Only minimal external protrusion. A contribution towards road safety since the risk of injury caused by dangerous, protruding fittings, is eliminated.
- Hinge and seal all-in-one along the entire length.
- Absolute precision when in the closed position the two aluminium profiles interlock together. They can only be dismantled when the door, tailgate, cover are open. Forced entry can only be made by cutting the plastic profile, leaving behind visible evidence.
- Vitually no wear.
- Totally maintenance free has been in practical use for more than two decades, primarily in the bodywork and vehicle area, tried and tested
- Supplied ready-assembled in standard and special lengths (by request).

THE FUNCTION

The 'hinge' takes a specially moulded plastic profile made from a special POLYURETHANE elastomer with permanent elasticity and high tear resistance. Opening angles of more than 180° or 270° are achieved depending upon the profile design. Continuous stress when in the open position requires the use of a holding mechanism to keep the hinge open, e.g. in the case of doors - a Door retainer.

POTENTIAL USES

Can be fitted to doors, tailgates, lids of all kind, as single element or as an add-on unit (for so-called folding or concertina designs), in bodywork and vehicle construction, for boot and van fixings, sales vehicles and buses etc. For use wherever flaps, lids and doors are required.

INSTALLATION

Is extremely simple since the TILA continuous hinge is supplied in the open position using spacers and with holes already pre-drilled, ready for installation.

- 1. Attach the TILA continuous hinge to door, flap or lid.
- 2. Fit the installation element to the installation frame and attach the 2nd blade of the TILA continuous hinge to it.
- 3. If you open the door, flap or lid further out the spacers fall out and the door, flap or lid is hinged and ready to use.

As with many 'synthetic' materials, care should be taken when subjecting the hinge to specific and specialised influences which may have unexpected detrimental effects. These include, amongst others hydrolysis, microbe infestation, sudden mechanical stresses (e.g. sudden opening) in conjunction with extremely low temperatures, corrosive acids, alkaline solutions and cleaning agent additives.

Moreover, we would ask you to consult us if you have any enquiries so we can provide you with optimum advice. The above mentioned technical data, information and recommendations are intended as a guide but is not binding! These reflect our latest knowledge at the time this product information was submitted for printing and does not exempt the user from carrying out their own precise examination of the potential uses for our products in each individual case.

We reserve the right to carry out design modifications. The technical data is intended as a guide but is not binding!

Figure 2

Suggested installation, non-binding - particularly important for flaps and lids. The TILA 22/180° continuous hinge should be installed as shown in Figure 2 and 3. Note the correct arrangement of the various aluminium clamping profiles on the panel and assembly element.

UNDER CHASSIS DOOR RETAINER

A compression spring is located inside a sealed aluminium profile housing which is tightened by plastic end covers and protected against dirt and humidity by 'O' rings.

The plastic cover on the front side is fitted with counter sunk stops which hold the arm in three 90° positions in the released position and prevent it moving into a position other than that required.

The aluminium strip comes with two longitudinal channels for holding the two, infinitely adjustable fixing brackets which are screwed or welded to the vehicle.

The internal parts are made of high grade steel, so are extremely durable, smooth-running and maintenance-free. The spring loaded arm has a stroke of approximately 230 mm.

- Aluminium profile, natural anodized
- End covers, plastic
- End cover screws, high grade steel
- Arm, steel, galvanized or high grade steel
- Cover on arm, rubber, black
- Fixing brackets galvanized/high grade steel

16-2 HEAVY DUTY BALL BEARING SLIDE 227KG
16-3 HEAVY DUTY BALL BEARING SLIDE 125KG

SELF CLOSING BALL BEARING SLIDE

PRODUCT DESCRIPTION:

 Light duty slide with silent softclosing

PRODUCT FEATURE:

- Ultra smooth gliding motion with high rigidity and stability design
- Enhanced silent soft-closing feature with light opening force
- Durable damping system with fast response capabilit

PRODUCT SPECIFICATION/ MODELS:

- Length: 300mm to 600mm (11.81"to 23.62")
- Side space: 12.7mm(+0.5mm-0mm)
- Load capacity: 45 kg /pair
- Travel: Full extensionMount: Side mount
- Disconnect: Lever disconnect
- Finish: Clear zinc
- Material: Cold rolled steel

HEAVY DUTY SLIDE 227 KG

PRODUCT DESCRIPTION:

Heavy duty slide

PRODUCT FEATURES:

- Ultra smooth gliding motion with high rigidity and stability design
- Durable damping system with fast response capability

PRODUCT SPECIFICATION/ MODELS:

• Travel: Full extension

• Mount: Side mount

• Disconnect: Lever disconnect

Material: Cold rolled steel

Load capacity: 227 kg
 Height: 76.2 mm (3076-##)

• Width: 19.5mm

^{*} More size ranges available on request

HEAVY DUTY SLIDE 125 KG

PRODUCT DESCRIPTION:

Heavy duty slide

PRODUCT FEATURES:

- Ultra smooth gliding motion with high rigidity and stability design
- Durable damping system with fast response capability

SECTION TWENTY

20-1 IX SERIES EARTH BARS 20-2 QX SERIES EARTH BARS 20-3 STAND OFF INSULATORS

IX SERIES BAR

FEATURES:

- Domed terminal screws
- 2 main M8 studs
- 165 amp current rating
- 2 screws per tunnel
- Fixing holes countersunk 4mm clearance
- Tunnels for 16mm² cable
- Numbered to 3mm high
- Unnumbered or special numbering available on request
- Tunnel holes chamfered
- All edges chamfered
- RoHS compliant

MOUNTING HOLES:

- 50mm centres up to 18 pole
- 120mm centres over 18 pole

SECTION TWENTY TWO

22-1 ILOQ ELECTRONIC LOCKING SOLUTION 22-12 ELECTRONIC CABINET LOCKS

ELECTRONIC LOCKING SOLUTIONS

- iLOQ is compatible with most modern Scandinavian and Euro cylinder cases
- No modifications to doors required

SIMPLIFIES THE DESIGN OF LOCKING SYSTEM:

- Self-powered iLOQ requires no batteries or cables in or around the doors
- Access rights can be easily modified for each purpose
- With cabling, iLOQ S10 can be extended into a remotely controlled system

SECURE AND FLEXIBLE ALREADY DURING THE BUILDING STAGE:

- Locks can be installed as soon as doors are in place
- In refurbishment applications, cylinders can be installed before work begins
- Access to work areas is simplified and multiple keys eliminated
- Different access rights can be set for staff

Lost keys are easy and fast to block and render worthless

- Battery-free digital key
- Key body made of stainless steel
- All iLOQ C10S lock cylinders and iLOQ K10S.1 keys are mechanically alike
- Secured using SHA-1 cryptographic engine, 64bit unique secret
- Access groups programmed at handover, maximum 15 groups
- Each key has unique identifier and can be individually blacklisted
- Laser stamped four digit random number
- Programmed by <u>iLOQ S10</u> Management software and iLOQ P10S Programming device or via iLOQ N001 Network module
- Erased upon return, may be reused, for instance in another locking system
- Dallas Semiconductor DS2432 1k-bit Protected 1-Wire® EEPROM with SHA-1 Engine
- Place for optional RFID pet disc (16 mm)

iLOQ CYLINDER OVAL

- Programmable electromechanic lock cylinder
- Self-powered: no batteries or external energy source required for the lock and key, and no need for cabling
- All iLOQ C10S lock cylinders and iLOQ K10S.1 keys are mechanically alike
- Standard sized and mechanically compatible with existing Scandinavian oval lock cylinders, and therefore easy to install
- Secured using powerful encryption methods; unique 64bit challenge and SHA-1 computed 160bit MAC pair for key authentication
- Programmed using a mobile phone or computer and <u>iLOQ</u> <u>P10S programming device</u>
- Blacklist for individual lost keys
- Access group list for key accesses
- Combined blacklist and access group capacity 128 entries
- Audit trail capacity 512-572 events
- Pre-blacklisting of lost key using new replacing key

SECTION TWENTY FOUR

24-1 ECOFONT 24-2 ECOFLOOR

ECOFONT

COMPOSITION (from outside to inside):

- Gelcoat RAL 9010
- Glass Reinforced Polyester
- High density PET recyclable foam
- Glass Reinforced Polyester
- White Gelcoat

APPLICATIONS:

- Industrial bodywork, LUV, mobile shops, bus
- Containers
- Advertising
- Food industry, cold chambers, cladding
- Building industry, partition walls, ceilings

OPTIONS:

- Color gelcoat on outside face
- Adhesive protection foil
- Dimensions on request
- Reinforced construction (x)
- Placing of inserts on request
- Maximum width 2400 mm
- Maximum length 11900 mm

THICKNESSES	WEIGHT	GLASS WEIGHT	K VALUE	PART NUMBER
12 mm	5.1 kg/m2	1300 g/m²		EFO12S
14 mm	4.6 kg/m2	1400 g/m ²	2.6 W/m²-°C	EFO14S

20 mm	5.1 kg/m2	1400 g/m ²	1.79 W/m²-°C	EFO20S
25 mm	5.5 kg/m2	1400 g/m ²	1.4 W/m²-°C	EFO25S
30 mm	5.9 kg/m2	1400 g/m ²	1.28 W/m²-°C	EFO30S
50 mm	7.6 kg/m2	1400 g/m ²	0.61 W/m²-°C	EFO50S

ECOFLOOR

CONNECTION TO CHASSIS:

Bonded to the longitudinal runners or to a metal profile which will allow the height necessary to clear the wheel arches.

APPLICATIONS:

- Industrial bodywork, floors of dry and insulated bodies, bus
- Catering containers
- Food industry, cold chambers
- Building, gangways, balconies

TEST AND SAFETY:

- The load capacity of all our floors have been verified on a factory built test bed.
- It consists of a manual pallet loader carrying a weight of between 500-1000 kgs. It is monitored by an automatic motor that will roll the load up and down the floor which can achieve 30,000 cycles per week.
- We consider that a floor has passed the test successfully if, after 60,000 cycles, the floor shows no visible or internal damage.

Core material PET HD foam

Self supporting

Maximum width 2400 mm

Maximum length 11900 mm

• Glass weight 2600 g/m²
