

SWITCH UP SHS AND F-SERIES SYMMETRICAL CUTOUT DOOR DESIGN

SELECTLOK®

SWITCH UP SHS AND F-SERIES SYMMETRICAL CUTOUT DOOR DESIGN

WHY SWITCH TO SWITCH UP?

Selectlok's Switch Up Swing Handle System (SHS) makes choosing, fitting & replacing swing handle locking solutions easier than ever before! Developed primarily around use within Modular Symmetry Door Frame Designs.

The patented Switch Up range of swing handles allow you to easily adapt your build to utilise the most popular industry lock inserts which can easily be changed in-situ without having to replace the entire handle or house large quantities of handle inventory. Instead, you need only carry the desired swing handle variant, and the range of Switch Up Inserts required to meet the changing demands of your client.

ALL YOUR NEEDS

The Switch Up range is available in either an IP42 polyamide or IP66 zinc, black PC / chrome PLT variants.

SWITCH-UP YOUR CYLINDER

Customer wants to change their cabinet to a pad lockable? No problem, just Switch Up the insert.

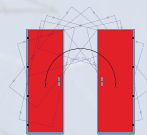

MANUFACTURE QUICKER

The Switch Up handle allows your assembly team to install blank handles. Fit the locking mechanism as customers confirm what they require.

MODULAR SYMMETRY

Designed for modular applications, Biaxial symmetry at the frame is essential to rotating the door around its centre point.

NEW F-SERIES CUTOUT

Using the new "F-Series" symmetrical door design cutout, the Switch Up allows you to utilise the same handle in either LH or RH orientated doors (designed with a biaxial symmetrical frame) via the use of the specially designed F-Series Adapter Plate. The Switch Up SHS range is fully compatible with all Selectrix 'standard' swing handle cutouts. *(No F-series adapter plate req.)*

PAD-LOCKABLE HASP

ECONOMY BARRELS

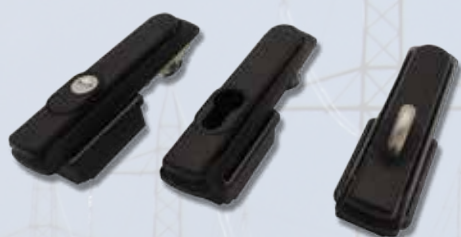

ALL YOUR INSERTS

Choose between inserts to suit half-euro profile cylinders, industry standard economy barrels (92268, CL001, CL003, CL604) and 316 - stainless steel pad-lockable hasp.

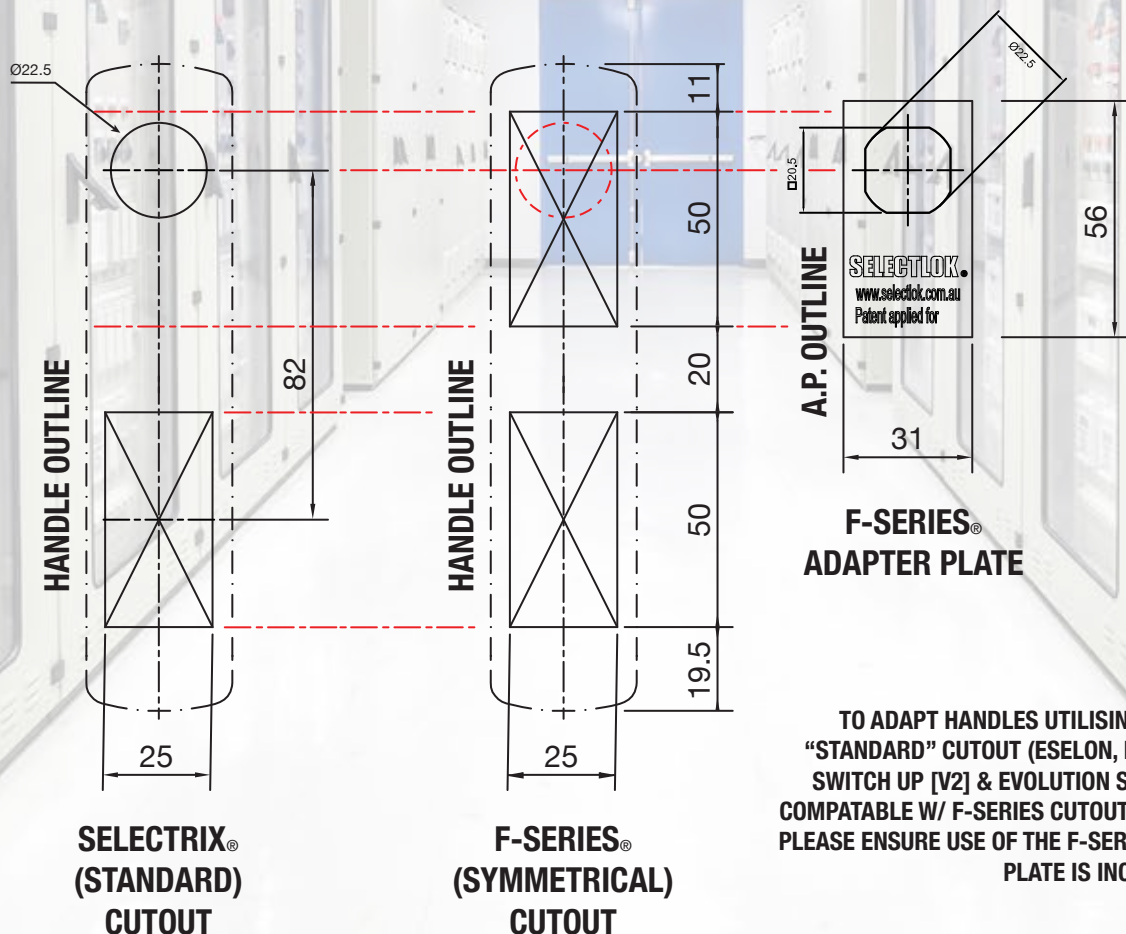

HALF-EURO PROFILE

FORM AND FUNCTION

With a vandal-resistant, flush design that features a shorter-style cam shaft and a positive feedback 'click' when the handle rotation reaches 90°, the Switch Up delivers superior feel and quality, all while helping to reduce your inventory management requirements.

- ⚙️ EASILY SWITCH UP BETWEEN PAD-LOCKABLE, KEYED BARREL OR HALF-EURO INSERTS (HALF-EURO CYLINDER SOLD SEPARATELY) *NON-LOCKING W/O INSERT
- 🔒 UNIQUE MODULAR DESIGN ALLOWS FOR EASY CONVERSION BETWEEN F-SERIES CUTOUT & STANDARD SELECTRIX (ESELON & MILLENNIUM SERIES) CUTOUTS VIA THE ADAPTER PLATE
- 🔒 POLYAMIDE: IP42 RATED - INDOOR APPLICATIONS ONLY
- 🔒 ZINC, BLACK PC / CHROME PLT: IP66 RATED - OUTDOOR/FULL EXPOSURE APPLICATIONS
- 🔒 90° HANDLE ROTATION FEEDBACK WITH “CLICK”
- 🔒 SHORT CAM SHAFT DESIGN
- ⚠️ SYMMETRICAL F-SERIES CUTOUT & 180° HANDLE ROTATION: ENSURES COMPATIBILITY WITH BOTH RH AND LH APPLICATIONS ON SYMMETRICALLY DESIGNED DOORS
- 🔒 VANDAL RESISTANT, FLUSH DESIGN
- 📦 REDUCES INVENTORY REQUIREMENTS

TO ADAPT HANDLES UTILISING SELECTRIX "STANDARD" CUTOUT (ESELON, MILLENNIUM, SWITCH UP [V2] & EVOLUTION SERIES) TO BE COMPATIBLE W/ F-SERIES CUTOUT TEMPLATES, PLEASE ENSURE USE OF THE F-SERIES ADAPTER PLATE IS INCORPORATED.
