iLOQ

Battery-Free Smart Locking

Secure Digital Access Solutions

The iLOQ range provides a digital solution to the most common problems with small-to-large scale deployment of locking security. With iLOQ you don't have to worry about key management, lock maintenance and manual tracking.

There are two main product lines: the S5 series & S50 series.
The S5 series focuses on keyed solutions. The S50 series focuses on keyless solutions - your smartphone does the unlocking. Both options use the same management software, making a easily manageable network of traceable keys and keyless locks.

Selectlok is the distributor and stockist of iLOQ components in Australia. If you are looking for a specific component, or seeking advice for a part needed in your project, please get in touch with us.
