Selectlok began as a small family business in the suburbs of Preston, Victoria in 1978. We now call Tullamarine, Victoria our home, with sales representatives across all of Australia servicing our clients needs.

We work directly with manufacturers to create innovative industrial hardware solutions, and are a driving force for creating ingenious solutions specifically for the Australian market.

Our in-house products and distributed ranges use only the highest quality manufacturing processes and materials. That's why we are trusted by the biggest manufacturers in Australia.

SELF GRIPPING**

PART NO. 1011-A3297  
BOX QTY: 2 x 50m rolls

► Grip Range: 2.0mm

## WHY SELECTLOK RUBBER?

**Don't settle for less. Great rubber will leave a long-lasting impression.**

Selectlok rubber products are made from "ethylene propylene diene monomer", also known as EPDM. This extremely versatile synthetic rubber is commonly used for sealing found in outdoor environments because of its hardy and highly resistant properties. It's also lightweight, compressible and easy to die cut making it a cost-effective rubber material for manufacturing.

### FEATURES:

- Withstands max temperatures within the range of -59°C to +149°C
- Resistant to water, air, weather, ozone, and heat
- High silica content gives the rubber better tear strength and fatigue resistance
- Creates 3 points of contact for superior sealing

**Please consult our website or Section 10 in our main catalogue for drawings and measurements.**
